TRAIN-THE-TRAINER IN INFECTION PREVENTION AND CONTROL COURSE

- 2023 -

PRESENTED BY INFECTION CONTROL AFRICA NETWORK (ICAN)

Course Overview

The TTT-IPC is a 12-week course. It starts off with a 5-day face-to-face contact session, followed by a 10-week period where students create their own training material, based on the ICAN curriculum, and train a minimum of ten of their own 2nd-level students. The process is ended with a 5-day evaluation period and formal examination of the ten trained 2nd-level students to determine the transfer of knowledge.

Course Outcomes

- Grasp the fundamental concepts of IPC and evidence-based practice.
- Acquired the necessary skills to apply a range of different techniques and methods toward teaching, learning and evaluation in IPC.
- Have strengthened their communication skills in training activities.
- Plan, implement and evaluate IPC activities.
- Be equipped with the required knowledge to be able to progress, depending on their examination results, towards either the Fundamentals in IPC (FIPC) or the International Postgraduate Diploma in IPC (IPDIC) coursed.
