

BASIC INFECTION PREVENTION AND CONTROL FOR FOR HEALTHCARE MANAGERS

- 2023 -

PRESENTED BY INFECTION CONTROL AFRICA NETWORK (ICAN)

Course Overview

This is a **5-day** course structured to provide **face-to-face didactic OR virtual lectures** in the morning and clinical visits/videos, group work and discussions in the afternoon. Each morning, there will be a quick revision of the previous day's work. On the last day, there will be a **formal examination** to assess competency.

This is an introductory course specifically designed for executive managers with an emphasis on the managerial perspective of IPC in developing health systems. It is not designed to be totally comprehensive, but to introduce basic knowledge of the role of IPC, statistics and surveillance, responsibilities, and legal aspects.

The aim of this short course is to familiarise operational/executive managers with knowledge on cost effective programmes based on evidence to improve the quality of care at healthcare facility level.

Target audience

This introductory course is specifically designed for operational/executive managers. This course will familiarize you with knowledge to support your daily decision making.
